

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site, guiding users from initial landing to product discovery, is bleeding value due to excessive choice and unclear direction, as evidenced by 'two equally prominent CTAs in the hero section, creating decision friction' and 'an overwhelming number of categories and sub-categories simultaneously' in the main navigation.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Competing Hero CTAs The homepage hero presents two equally weighted primary calls to action, creating decision friction.	High	Medium	5/10
2	Vague Hero H1 The hero H1 is a strong brand statement but lacks direct product-finding guidance.	High	Medium	5/10
3	Shipping Delay Friction A prominent shipping delay notice on the homepage and product pages creates significant friction and distrust.	High	Medium	5/10
4	Transparent Shipping Fee The specific shipping cost for orders under \$100 is only explicitly revealed after adding an item to the cart.	High	Medium	5/10
5	Missing Collection H1 The 'Shop All' collection page lacks a clear H1, hindering SEO and immediate user understanding.	High	Medium	5/10
6	Unlabeled Form Inputs Forms across the site rely on implicit labeling rather than explicit `` elements, reducing clarity and...	High	Low	5/10
7	Heavy Script Load The homepage loads 63 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
8	Mega-menu Overload The main navigation's mega-menu presents an overwhelming number of categories and sub-categories, leading to...	High	Medium	5/10
9	No Product Social Proof Product cards on collection pages lack visible social proof, making it difficult for buyers to quickly assess...	High	High	4/10

#	Finding	Severity	Effort	PXL
10	Unnamed Controls Many interactive controls expose no text label, making them unusable for screen readers and voice control.	High	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
